Test Standard

- ANSI / ASHRAE standard 70
- Isothermal air used during testing.

Sound Levels

- NC is noise criteria curve that will not be exceeded at the operating point. This is determined by assuming a 10dB (ref: 10⁻¹² watts) room attenuation that is subtracted from the power levels in each of the 2nd thru 7th octave bands

Throw

- The numbers shown are throw distances, in feet, measured along the jet trajectory axis relating to terminal velocities of 150, 100, & 50 fpm, with the jet attached to the ceiling surface.

Pressure

- P_S represents Static Pressure, inches of water
- -P_S represents static pressure, inches of water, for ceiling plenum return applications
